

WHEN YOU NEED
ENGINEERING EXPERTISE,

**you can depend on
DORNERWORKS.**

Embedded Systems Engineering

Not every project goes as planned. Perhaps, despite your best efforts, your project has fallen behind schedule. Or maybe you're short staffed and not equipped for the demands of a sizable project. Or it could be that a technical glitch or a new system has stumped your staff.

When you need help with an embedded systems engineering project, you can depend on **DORNERWORKS**. We partner with you to complete your project on time and on budget, while upholding your high standards for safety and quality.

We offer the following services:

- Electronic Hardware Development
- Electronic System Architecture
- Embedded Software Development
- FPGA/ASIC Custom Logic Engineering
- Requirements Definition
- Verification and Validation

THE DORNERWORKS DIFFERENCE

KNOWLEDGEABLE PEOPLE

With combined experience of more than 200 years, the engineers at DORNERWORKS can tackle your most complex projects.

We've designed and developed systems for some of the most demanding environments, including the aerospace, medical and automotive industries. We're a blend of seasoned PhDs and patent holders and bright young graduates, bringing expertise and energy to each project. Knowledgeable, hardworking and innovative, our people will become a valuable resource for your project.

QUALITY SOLUTIONS

We are dedicated to providing solutions that are safe and of high quality.

We follow industry procedures, maintain meticulous documentation, and engage in testing during every phase of the project. Our clients in safety conscious areas have come to rely on our knowledge of industry requirements and scrupulous attention to detail.

DEPENDABLE SERVICE

"This project was probably one of the smoothest that I have been associated with in the last several years and I will not hesitate to provide additional work or recommend your company for supporting other in-house efforts."

*Engineering Project Manager
at Smiths Aerospace*

We assemble a "dream team" for each project.

The team is equipped to handle all of the technical aspects of your project using our proven internal processes. We work at the pace you set. Fast turnaround times don't faze us. Our clients, which include some of the largest companies in the aerospace, medical and automotive industries, know they can depend on us to complete their project according to their specifications in a cost-effective and timely manner.

"DORNERWORKS finished the project for one-third the cost and under half the time of what others had estimated."

*Vice President of
Engineering at
X-Rite, Inc.*

COLLABORATIVE APPROACH

We enter into each business relationship with the intent to form a long-lasting partnership.

The same DORNERWORKS engineers work with you throughout your entire project, getting to know your company, listening carefully to your needs and establishing consistency and trust. The primary focus of our collaborative effort is your company's success.
